

The Sault Area Chamber of Commerce supports SBC in its efforts to offer long distance service in Michigan. The Chamber represents 450 businesses in Chippewa County. We believe SBC's entry into the market would provide consumers with another choice and additional competition will keep prices down. Fair competition is important in all aspects of the telecommunications industry, including local and long distance service. It would be advantageous to our members, as well as the local community, to have more choices and lower costs when considering their telecommunications options.
